HYGIENE CLAD INSTALLATIONS

BEFORE & AFTER

“ Food safety is a big focus for us, and Hygiene-Clad gave us a smooth, easy-to-clean surface with fewer places for dirt or moisture to build up.

- Quality Manager | Tegel Foods

✓ STRICT REGULATORY COMPLIANCE

Facilities require surfaces that produce low bacterial counts during routine swab testing. Systems like Hygiene-Clad are BRANZ Appraised and satisfy modern hygienic construction codes.

✓ REDUCED CLEANING COSTS

Traditional walls require frequent painting, repair, and tedious grout scrubbing. These PVC systems are virtually maintenance-free and easy to wipe down.

✓ SUPERIOR DURABILITY

The non-porous sheets do not rot, rust, or corrode when exposed to moisture or harsh sanitizing chemicals.

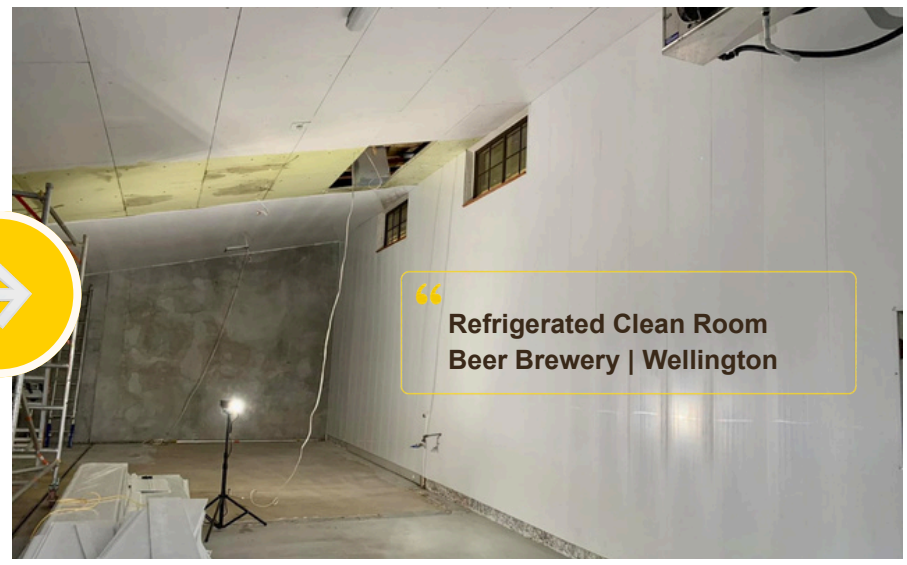

✓ FAST, SEAMLESS, INSTALLATION

Tongue-and-groove systems with hidden fasteners eliminate exposed edges where bacteria can build up.

✓ FIRE SAFETY SAVINGS

Hygiene Clad has a Class A fire rating, which improves facility safety and can lead to lower insurance premiums.

External Corner Set

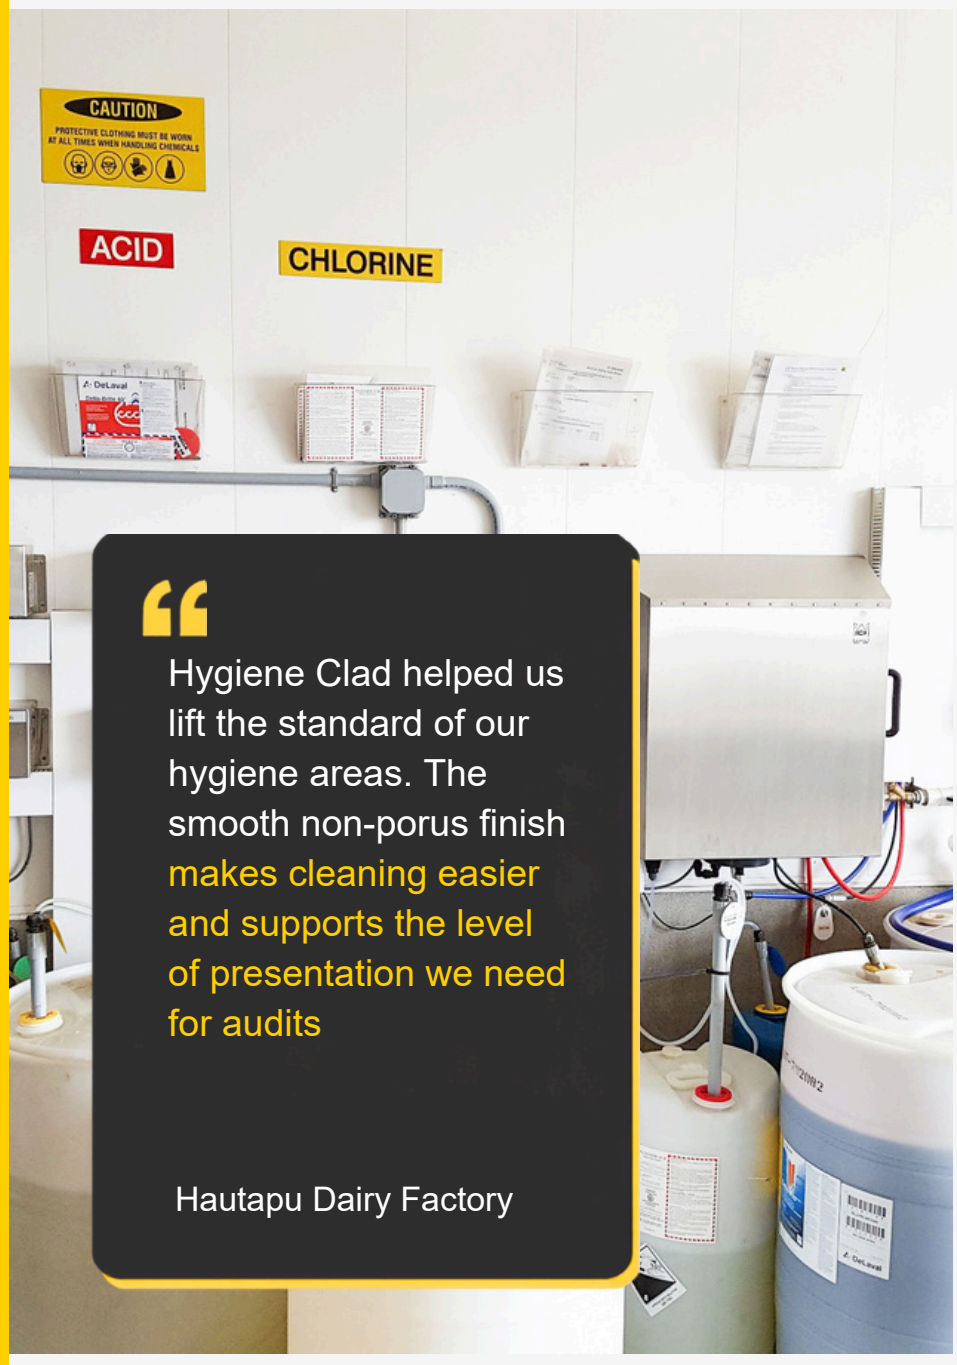

Trims, Joiners, and Corners are available to accommodate all of your project requirements.

> Hygiene-Clad was a game changer for us because of the corrosive salts in our production plant.
>
> Peter G | Engineering Manager
>
> — Fish Processing Warehouse

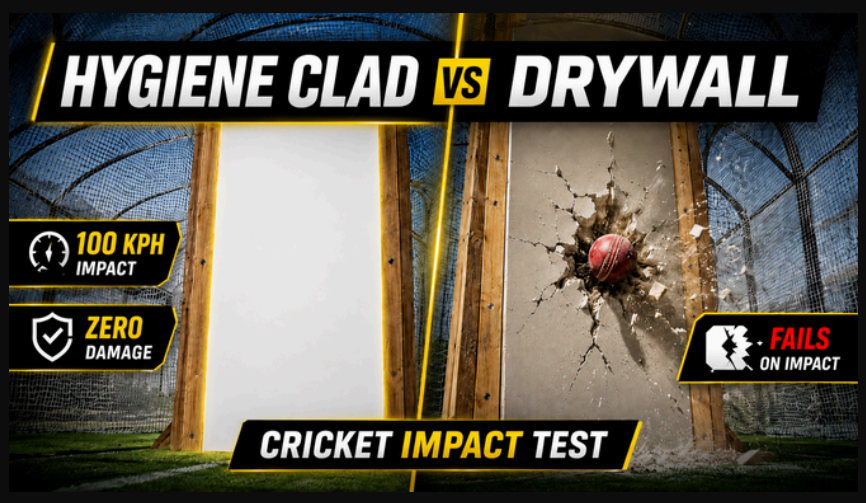

> We needed a long term, hygienic wall lining that could handle regular washdowns without rusting, rotting or peeling
>
> — Fonterra

> Hygiene Clad helped us lift the standard of our hygiene areas. The smooth non-porus finish makes cleaning easier and supports the level of presentation we need for audits
>
